

Unit Test Status Report

The Unit Test Status Report documents whether expected results were achieved during the execution of the unit test. This document builds on the Unit Test Conditions and Expected Results by adding two columns (Expected Results Achieved? and Comments)..

The descriptions of the fields/terms used in the above sample document are given below.

Columns 1 – 14 are taken directly from the Unit Test Conditions and Expected Results template. Please reference this in the Detailed System Design phase.

[15] Expect Results Achieved? – Indicates whether the expected results were achieved.

[16] Comments – Captures any relevant comments.

Unit Test Conditions and Expected Results: PTS System

[1] Product: Problem Tracking System (PTS)

[2] Release: 1.0
